VFF-patent

VFF – experience that pays

Founded in 1967, ongoing innovation and the highest possible standards of quality have allowed VFF to develop into Europe's largest producer of tower packings and inert balls. VFF has now become a globally operating company with more than 30 representations.

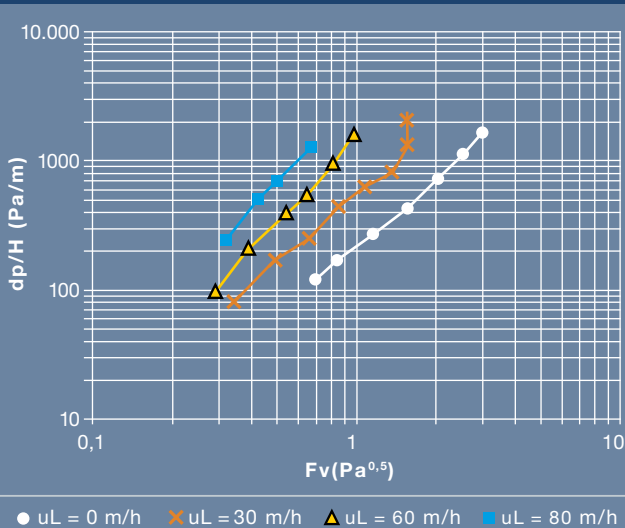

VFF supplies a full range of tower packings, inert balls (catalyst support material), column internals, plastic packings and droplet separators (demisters), software and consulting for mass and heat transfer applications all over the world.

VFF offers its customers optimum operational safety with high-quality products Made in Germany and is characterised by innovation, flexibility and performance strengths.

You can also find further information about VFF's products online at www.vff.com

VFF-Gridlox made of ACIDUR®-Special-Stoneware

Pressure drop (dp/H) vs. gas load factor (Fv)
 Aspec = 290 m²/m³ Gspec = 550 kg/m³ ε = 0,77 m³/m³

The new lattice-type random packing VFF-Gridlox is positioned almost plane during filling and enriches the VFF delivery program with a random packing of an inner structured pattern. The VFF-Gridlox is applicable in a wide range of applications and can be used as covering bed on top of the catalyst bed or as an entire random packing bed. The VFF-Gridlox is available in one dimension, the specific surface is approx. 290 m²/m³.

VFF-Gridlox – Physical properties

Name	Nominal size	Specific weight	Specific surface	Void space
		kg / m ³	m ² / m ³	m ³ / m ³
VFF-Gridlox	No 1	550	290	0,77

Subject to technical modifications. All details serve for preliminary information purposes only. Claims cannot be derived therefrom. Specification sheets are available on request. The usual, permitted tolerances for ceramic products apply.
